

# How to view date of last network authentication of a SIM card

SIAM has the ability to show the last time a SIM card authenticated on the network.

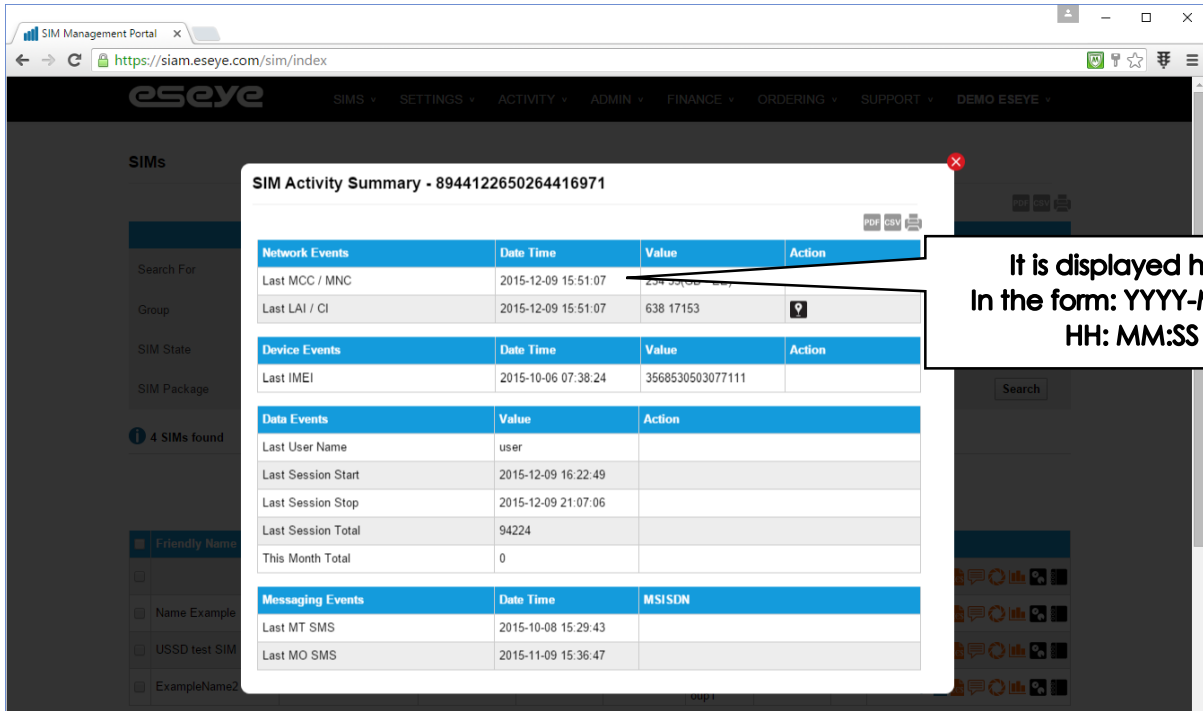

This is found at SIMS > SIMs List > Action > :

The screenshot shows the SIM Management Portal interface. At the top, there is a navigation menu with options like SIMS, SETTINGS, ACTIVITY, ADMIN, FINANCE, ORDERING, SUPPORT, and DEMO ESEYE. Below this is a search bar and a filter section for SIMs. The filter section includes dropdowns for Search For (ICCID), Starting With, Group (All), SIM State (Provisioned), and SIM Package (All). A 'Search' button is located at the bottom right of the filter section. Below the filter section, it indicates '4 SIMs found'. A pagination control shows 'Page (1/1)' with a dropdown set to '10'. The main content is a table with the following columns: Friendly Name, ICCID, MSISDN, IP, Data Usage, Group, Status, Alert, and Action. The Action column contains a SIM card icon, which is circled in red in the image. The table lists four SIMs, all with a status of 'provisioned' and a group of 'ExampleGroup1'.
